

Amendments to the Claims:

The listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-9. (cancel)

10. (new) A device for controlling the representation of information on a vehicle screen, comprising an actuator about a longitudinal axis (z) and movable transversely with respect to the longitudinal axis (z), wherein a portion of the information is represented on the vehicle screen and is displaced by a deflection movement of the actuator transversely with respect to the longitudinal axis z, and wherein discrete markable elements can be marked by a rotational movement of the actuator about the longitudinal axis (z), wherein the information comprises the discrete markable elements.

11. (new) The device as claimed in claim 10, wherein each one of the marked discrete markable elements is selected by moving the actuator axially with respect to the longitudinal axis (z).

12. (new) The device as claimed in claim 10, wherein the information is provided in a lateral representation, wherein the portion of the page represented on the vehicle screen is smaller than a page size.

13. (new) The device as claimed in claim 12, wherein finished pages are received from outside the vehicle via a communications device and can be represented on the vehicle screen.

14. (new) The device as claimed in claim 13, characterized in that the finished pages are Internet pages.

15. (new) The device as claimed in one of claims 13, wherein each one of the discrete markable elements comprises a reference to one of at least one further page and at least one image.

16. (new) The device as claimed in claim 15, wherein selection of the reference represents the said one of at least one further page and at least one image on the vehicle screen.

17. (new) The device as claimed in claim 10, wherein the information are messages which are received from outside the vehicle.

18. (new) The device as claimed in claim 10, wherein each one of the discrete markable element comprises a telephone number or an address.

19. (new) The device as claimed in claim 11, wherein the information is provided in a lateral representation, wherein the portion of the page represented on the vehicle screen is smaller than a page size.

20. (new) The device as claimed in one of claims 13, wherein each one of the discrete markable elements comprises a reference to one of at least one further page and at least one image.

21. (new) The device as claimed in one of claims 14, wherein each one of the discrete markable elements comprises a reference to one of at least one further page and at least one image.

22. (new) The device as claimed in claim 11, wherein the information are messages which are received from outside the vehicle.
